

A career is an ongoing journey of discovery: our 52,000 people are shaping how the world lives, works and plays through next generation advancements in healthcare, life science and performance materials. For 350 years and across the world we have passionately pursued our curiosity to find novel and vibrant ways of enhancing the lives of others.

Your role:

The EHS Associate Director supports the Site Director in this task directly by keeping him and the site management team up to date on EHS development (both regulatory and otherwise), highlighting non-compliance to established rules, standards and best practice procedures on site, proposing site specific EHS targets and goals (in line with corporate goals), informing local management regularly on EHS audit and inspection results and keeping them up to date on closure of identified gaps.

The assigned EHS Associate Director also bears the responsibility for the appropriate implementation of EHS measures/activities and must employ the supplied means and material, wherever these are necessary. He/She must report any defects that are identified to the delegating Management and take full accountability of Site Security Officer.

The EHS Associate Director participates actively in the global EHS community for best practice sharing, contribution to the initiatives for the GMS global strategy and improvement path (in line with Global GMS and corporate goals).

Who you are:

- Swiss authorities recognized Security Engineer or industrial hygienist (CFST)
- You have a sound vision of Environment, Health and Security
- A minimum of 10 years experience in a EHS role within the industry
- A great experience of People Management
- Fluent in both French and English
